

```
wjr::json::__document  
_serializer_array< std  
::unordered_map< Key, Value,  
Hash, Eq, Alloc > >
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a grey box representing the base class, `wjr::json::document_serializer_impl`, which contains a template definition for `_serializer_impl`. Above it is a white box representing the derived class, `wjr::json::__document_serializer_array`, which contains a template definition for `_serializer_array`. A blue arrow points from the top of the grey box to the bottom of the white box, indicating that the white box inherits from the grey box.

```
wjr::json::document  
_serializer_impl< std  
::unordered_map< Key,  
Value, Hash, Eq, Alloc > >
```
