

std::exception

```
classDiagram
    class std_exception["std::exception"]
    class wjr_bad_expected_access["wjr::bad_expected_access< void >"]
    wjr_bad_expected_access --|> std_exception
```

The diagram illustrates an inheritance relationship. A light gray box at the top represents the base class 'std::exception', divided into three horizontal sections. A dark gray box at the bottom represents the derived class 'wjr::bad_expected_access < void >', divided into three horizontal sections. A blue arrow with a hollow triangular head points from the top section of the derived class to the bottom section of the base class.

wjr::bad_expected_access
< void >

+

what()
