

```
wjr::json::__document  
_serializer_array< std  
::unordered_multimap< Key,  
Value, Hash, Eq, Alloc > >
```

The diagram illustrates an inheritance relationship between two C++ classes. At the bottom is a grey box representing the base class `wjr::json::document`. It contains the definition of `_serializer_impl` and has two empty slots below it. A blue arrow points upwards from the top of this box to the bottom of a white box above it. The white box represents the derived class `wjr::json::__document`. It contains the definition of `_serializer_array` and has two empty slots below it.

```
wjr::json::document  
_serializer_impl< std  
::unordered_multimap<  
Key, Value, Hash, Eq,  
Alloc > >
```
